OBJECT ORIENTED WEB PROGRAMMING USING RUBY

Day 11: 22/June/2017

Discussion

ToDo.Common.txt

Check "ToDo.Common.txt" file on the project root directory.

It contains your ToDos, which you declared on Day 10 lecture, and should be updated every week.

Discussion

Run the program which you would have written by the 11th lecture day.

Explain what you would have done, trace the source code, and explain the meanings of the source code.

Discussion on the implementation will be held.

Test Script

If you had written the test script, explain what you wanted to test, and how you described the specification.

When you had written the test scripts, write it in the Done.txt file.

Update Done and ToDo

Everyone, update Done and ToDo file, by next week.

Possibly, if conditions are satisfied, finish own part, and start writing the test scripts.
